Germany Beck Project

Weeks 26 & 27 commencing 5th December

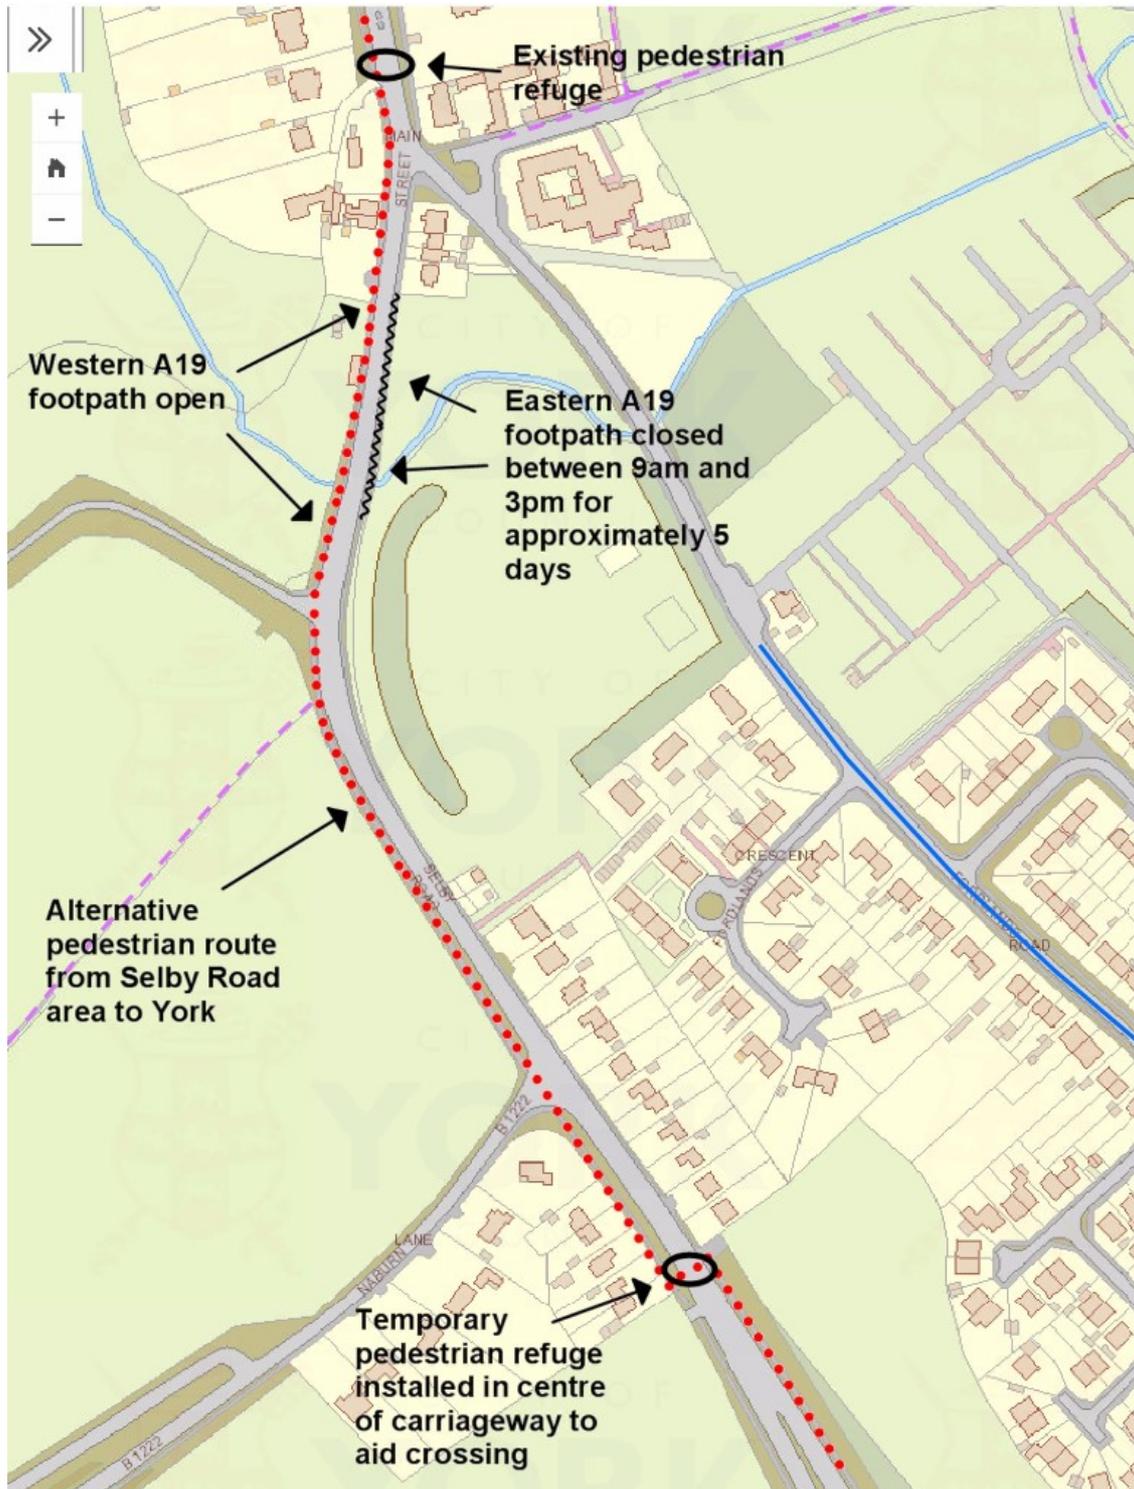

During the past 2 weeks we have been placing stone fill adjacent to the A19 in preparation for the piling works that will recommence after Christmas. We have also been installing drainage to the east of Fordlands Road.

During the next two weeks we will be progressing with the drainage to the east of Fordlands Road.

In preparation for the piling works that will recommence after Christmas we will also be carrying out the removal of trees stumps that lie within the site boundary in the vicinity of the Germany Beck culvert that runs beneath the A19.

In order gain access to the tree stumps we need to close the footpath that runs along the east of the A19 between the hours of 9am and 3pm for a period of approximately 5 days. Having monitored the number of pedestrians using the footpath between those hours we know that this should not inconvenience many. However signs will be erected on Selby Road and Main Street to advise you of the footpath closure and a temporary pedestrian island will be installed at a point on Selby Road, as agreed by CYC, to aid those wishing to cross the A19 during those times. We expect the temporary footpath closure to be in place week commencing 12th December.

You will also see traffic cones placed on the A19 which will reduce the width of the A19 slightly adjacent

Safety for children and the wider public.

Please be assured that the different areas of works will be securely fenced at all times to ensure the safety of the public.

We will be receiving few deliveries to site this week. Each delivery will be guided into site by one of our employees once traffic and pedestrians are clear from the site entrance. Please be patient if you are held up for a short time whilst these manoeuvres take place.
