Germany Beck Project

Weeks 104 & 105 commencing Monday 11th June 2018

This is the 53rd edition of the newsletter that keeps you up to date with the progress of the Germany Beck junction works on the A19 in Fulford.

Work continues to Landings Lane and the A19.

The capping beam and brick wall have progressed north up the A19. Surfacing has been laid to Landings Lane.

New ducts and street lighting column sleeves have been installed in Fordlands Road for the new street lights.

In the flood alleviation wildlife meadow we have been completing the top surface of the footpath.

During the next 2 weeks the masonry wall will follow the progression of the concrete capping beam north along the A19.

Street lighting columns will be installed this week on A19 and the spine road. They should be lit by the end of the week.

Pedestrians will continue to use the new eastern footpath while the western footpath remains closed until the end of the works.

Elsewhere on site we are continuing with the first roads into the new residential development following the ongoing drainage installation.

OFF PEAK TEMPORARY TRAFFIC SIGNALS ON A19 WEEK COMMENCING 11th JUNE

During week commencing Monday 11th June, off peak temporary traffic signals will be in use intermittently on the A19 to enable us to install some ducts and pipes across the A19.

New A19 footpath route

Safety for children and the wider public.

Please be assured that the different areas of works will be securely fenced at all times to ensure the safety of the public.

We will be receiving deliveries to site this week. Each delivery will be guided into site by one of our

employees once traffic and pedestrians are clear from the site entrance. Please be patient if you are held up for a short time whilst these manoeuvres take place.

Pedestrians will be given right of way along the footpaths of Fordlands Road but please be aware of deliveries using the entrances to site off Fordlands Road on occasion.
